

## About Us

Keith Shea, founder of Fit and Fertile Ltd

and Frozen Stud Dog has been actively involved in animal reproduction for over 25 years. He has produced in excess of 250,000 piglets born via Artificial Insemination.

During the past 10 years Keith has been proactive within the Canine Breeding Sector offering ultrasound scanning, fertility testing of stud dogs, artificial insemination of bitches and developed a range of products to increase breeding potential and general well being for dogs of all ages. Since 2005, he has promoted a service to breeders enabling stud dog semen to be processed for both fresh/chilled and frozen procedures.

Having trained within the Agriculture industry in the UK and University of Vienna, Veterinary Sciences, Department of Animal Breeding and Reproduction under the personal supervision of Prof. Schaffer-Somi, where he gained a certification in Canine Sperm Evaluation and Preparation of Semen for fresh/chilled and freezing procedures .

Shipping of fresh/chilled or frozen semen can be organized to destinations world-wide. We have the equipment for hire to enable the shipping of fresh/chilled or frozen semen.

We are delighted to offer a facility to stud dog owners world wide to advertise the availability of their stud dog(s) of semen freezing, fresh/chilled also availability for natural matings through our Stud Dog Register.

Frozen Stud Dog Semen Bank, is a facility that allows stud dog semen to be stored and made available to breeders. This gives the owner the opportunity to input their stud dogs details, add photos and pedigree details opening worldwide opportunities.

Fit And Fertile Ltd and Frozen Stud Dog are based in Preston, Lancashire, the laboratory facility is available for breeders, for the Semen Collection & Preparation. We welcome evening & weekend appointments at no extra cost. Our new mobile facility to open to breed meetings, shows and holding venues for 5 or more stud dogs.

If you have any questions or queries, please do not hesitate to contact the office (+ 44) 01772 690014.

Making available the genetics you have developed, Preserve today, Thaw the future.
